Gang Assemblies provide a simple and cost effective option. They are widely used when the ability to use either harrows or press wheels is required. These gangs are easily configured for use with a number of popular quick release harrow/press wheel mounting arms. Gangs are often preferred due to the lower maintenance requirements, ie less bearings. Gangs work best with up and back sowing. Manutec gangs can be quickly removed when not required or for maintenance.

#### **Mount Arm Gang Assembly**

Ideal for use in applications where interchangeability with Harrows is required. 18" Wheels with Nylon Bush Centres used as standard.

Gangs are available in 4,5,6,7,8,9 and 10 wheel configurations depending on the spacing width. Normally we like to limit sections to about 6'.

#### **Mounting Arm**

Quick Release Mounting Arm, compatible for use with either Press Wheel Gangs or Harrows

A complete range of spare parts is available for all gang components.

#### **Mount Arm Gang**

Available in 7.2", 9" and 12" spacings as standard in a variety of wheel numbers. For other spacing widths contact Manutec for availability. Available in a range of tyre options. Manutec normally recommends a thicker tyre, either semi-solid or solid, especially if being used to dry sow.

#### **Harrow Arm—3 or 4 Harrow Option**

Quick release arm for connecting harrows to Mounting Arm

# **GANG CONVERSIONS**

## **REFURBISH YOUR EXISTING GANG OR FIT OUT YOUR NEW GANG WITH NEW WHEELS DESIGNED TO OPERATE IN YOUR CONDITIONS**

If you are buying or already have a new or second hand Gang Assembly with either steel or poly wheels that either are not suited to your conditions or are simply worn out then Manutec Gang conversions offer a good solution. Simply unbolt the existing wheels and axles from the gang frames and replace with Manutec parts. Very popular for converting Flexi-Coil and Bourgault Gangs. This eliminates the problem of removing the existing wheels from the axles to replace them with new wheels, which on some gangs is a time consuming and sometimes an almost impossible task. The Manutec kit provides new axles, spacers, bearings and wheels. Additionally the unique Manutec spacer system is guaranteed to never seize up, making future maintenance an easy task and extending the life of your gang by many years.
