Swivel Arm Assemblies

Swivel Arm Assemblies are designed to be mounted on a low tool bar across the back of the machine. This can be done on either a fixed tool bar or an adjustable toolbar. Sections can be quite long if necessary as the assembly weight is low, or alternatively they can be set up in fixed or removable gangs. The gang method can give the flexibility to remove the gangs and run harrows if required. This gives the advantages associated with removable gangs with the unique performance of wheels that swivel and press independently of each other.

Swivel Arms Assemblies Configured as Individual Gang Assemblies

Manutec individual gang assemblies are ideal for those looking for the convenience of gangs with the independent operation of a single assembly. These are available in a number of mounting configurations and the units will mount easily on to 3x3 RHS. Each individual unit can be fitted with any tyre from Manutec's 15" or 16" tyre range. This is the same assembly as the single rear mount assembly, only configured so as to be run in gangs of 5 to 8 depending on spacings. Gangs can be set in fixed or Quick Release variants. Running in this configuration provides the flexibility of interchanging with Harrows if required.

All wheels come standard with Integral Hubs and 40mm Round Stub Axles, with Taper Bearings and Marine Triple Seal.

Single Rear Mount Swivel Assembly - (15" Wheels)

Mounts onto 3" RHS. Can be run in gangs of 5 to 8 depending on spacings.

15PWSRMT+

Mounting Arm—Quick Release Option

Used on machines when the option of also running harrows or no press wheels at all is also required. Assemblies can be set up in gangs of 5 to 8 depending on spacings.

PWGANGMOUNTARM

Mounting Arm—Fixed Option

Used on machines when press wheels will be run 100% of the time.

PWSRMARM

Swivel Arm Assemblies

A range of mounting options are available for this type of assembly. The simplest and cheapest is to build a new fixed toolbar off of the existing rear frame of the machine. Mounting Arms as per above are available if a more temporary solution is required, however this will add cost.

Manutec carries a complete range of spare parts for all products and most parts can be shipped within 24 hours of ordering.
